

I had planned to kill myself first and leave a note behind telling what had happened. I didn't believe I could face my family when the truth was revealed.

This is only a small piece of the story, but I did want to tell you that if you're ever interested in doing another article, please let me know.

In the meantime, take care of yourself. In order for me to receive your mail quicker, put your name only on the envelope and don't use company stationery. If you do, it'll probably go to the review comm. again.

Sincerely,
Susan
